

INSTRUCTIONS FOR USE

TOOTHPASTE

After each meal, take care of dental hygiene with XeroLacer Toothpaste and a LACER Technic Soft toothbrush.

MOUTHWASH

After cleaning your teeth, rinse out your mouth 3 times a day with 10 mL of undiluted XeroLacer Mouthwash. Swish it around in your mouth for 1 minute and spit out. The recommended quantity provides just the right amount of active ingredients for effective hydration and protection, along with a refreshing taste. Do not rinse your mouth with water, drink liquids or eat food for 15 minutes after rinsing.

SPRAY

Spray 2 or 3 times directly in the mouth. Do not rinse your mouth with water, drink liquids or eat food for 15 minutes after application. The spray can be applied as often as necessary, though the number of applications should be adjusted for each individual case. When the spray bottle is empty, it can be refilled with XeroLacer Mouthwash.
